PURPOSE and GOALS OF SERVICE:

Manawa Lea Adult Day Health Services is designed to address the self care and community integration needs of consumers with moderate, severe, and profound developmental disabilities and/or significantly chronic medical conditions.

It is our philosophy that all persons have the right and should be afforded the opportunity to live, work, make individual choices, and enjoy leisure activities with dignity and in as normalized a setting as possible. Emphasis is directed toward providing each consumer with adequate skills to continue living in the least restrictive environment. Should additional skill attainment in a particular area seem unrealistic, prevention of deterioration becomes the goal.

BASIC SERVICES:

The Individualized Plan (IP) addresses the self care and community integration needs as determined by each Individual Service Plan (ISP) using small group instruction and 1:1 training in accordance with the consumer's needs. Emphasis is directed toward providing each consumer with adequate skills to continue living in the least restrictive environment. IP components from which ISP goals are drawn may include, but are not limited to the following:

- Self Advocacy
- Communication
- Community Integration
- Activities of Daily Living
- Socialization
- Recreation and Leisure Skills
- Sensory Motor Skills
- Health-related services are provided (either through basic services or contractual arrangements) for persons requiring these services as determined by the consumers support team and in accordance with the Individual Service Plan.

DAYS & HOURS OF PROGRAM OPERATION:

Manawa Lea is a twelve month, year round program, operating Monday through Friday, 8am to 2pm, and observing standard legal holidays.
